#### SPECIFICATIONS

Material: 6061-T6 aluminum alloy, Type III hard anodizing.

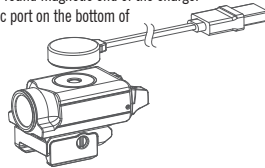

#### CHARGING

Before your first use, fully charge the light with the supplied magnetic charging cable. When the battery level is low while turned on, the side indicator will turn red. Please charge again at that time.

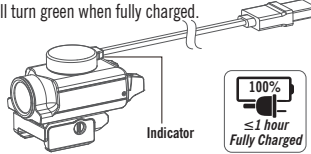

1. Connect the provided magnetic charging cable to a USB power source or any USB port.

2. Connect the round magnetic end of the charger to the magnetic port on the bottom of the PL-Mini 2.

3. The indicator on the charging cable is red while charging and will turn green when fully charged.

#### LIGHT INSTALLATION

Check your firearm compatibility and choose the correct sized rail adapter:

This light can be installed on a MIL-STD-1913 or Glock style rail with an available notch. The Glock adapter labeled GL is already installed, which can be immediately used on all Glock sized rails. For firearms using Picatinny (mil-std-1913) rails, the user must replace the GL adapter with the included 1913 adapter using the screws and socket head wrench provided in the package.
